The prior art also fails to teach and/or fairly suggest an acceleration sensor comprising an acceleration sensor element and frame portion surrounding the sensor element, the sensor element and frame portion being located on a substrate, an intermediate layer formed on the frame portion, and a cap portion bonded to the intermediate layer, wherein a groove in the form of a frame is provided between a part of the frame portion in a junction region of the intermediate layer and cap portion and a part extending toward the sensor element, such as illustrated by groove 38 in Fig. 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
